Printing the Print Competition Labels

The Print Competition Labels are designed to print on Avery 8163 2" x 4" mailing labels or equivalent. To get proper registration you will need to set *Page Scaling* to *None* in the Acrobat printer driver pop-up. Also check *Auto-Rotate and Center*. Failure to do so may result in misregistration of the labels. You may wish to do a test run using plain paper before sacrificing a label page. The labels have been successfully test printed on a HP Laser Jet 1020 laser printer and an Epson Stylus Photo 900 printer.
